Double-flange type (for deep concrete slab-layers)	3.20kg	ES220

A waterproof earth electrode seal for use in constructions where internal earths are specified.

The unique design allows the seal to be effective across a broad range of rod diameters from a nominal 1/2" to 3/4" rod, by the use of various compression rings and seals. For use with PT205 - lightweight inspection pit.

A separate datasheet is available should you require further information.
