

D110P

1 port E1/T1/J1 digital line voice board.

Document Rev0.01

D110p is a high-performance, cost-effective signal span digital voice card. Provide compact and powerful interface to asterisk that can support E1/T1/J1 and PRI interface.

D110p support industry standard protocols, including PRI, Cisco PPP, Frame relay etc. The low profile allows it to fit within a 2U rack-mount case.

Features:

- ✓ 100% hardware compatible with TE110P. Use same device driver without any modification.
- ✓ Industry Standard: PCI 2.2 both 3.3 volt and 5 volt pci slot can be used.
- ✓ RJ-45 shielded connector.
- ✓ E1/T1/J1 software configurable.

Software and hardware installation are similar to TE110P.
