

FIRST BASE 3 – FR

FLAME RETARDANT BUMP PROTECTION

PROTECTING AGAINST BURN OR BUMP INJURIES TO THE HEAD

The First Base 3 flame retardant bump protection cap is designed to protect workers in environments where hot sparks are generated from process, such as, automated welding or grinding or where maintenance technicians, operators or visitors, are exposed to or have to work with flammable liquids that could burn the head or potentially ignite hair.

First Base 3 FR helps remove the uncertainty a safety officer faces that a worker may be wearing a regular non flame retardant protective cap; a flame symbol is embroidered at the rear on both sides of the cap, so that it is clearly visible a flame retardant cap is being worn in areas identified to be a flammable risk.

PRODUCT HIGHLIGHTS

- No direct ventilation holes minimises potential burn risk
- Completely flame retardant (coated cotton) outer cap
- Over-locked outer fabric safeguards against internal ignition
- CE certified to EN812:A1 including optional 'resistance to flame' clause (5 second extinguish)
- Flexible ABS protective shell guards against bumps and lacerations to the head

*ABS - (Acrylonitrile Butadiene Styrene)

Utilises the First Base 3 Flexi Shell to fit a wide range of workers

SCOTT
SAFETY

PROTECTING AGAINST BURN OR BUMP INJURIES TO THE HEAD

FIRST BASE 3 - FR

Fully machine washable at 40°C

Provides a universal fit to a wide range of head size (52-65cm)

Available in Navy Blue

High performance sweatband absorbs and wicks moisture away quickly

Reduced Peak (55mm) and Micropeak (25mm) options for enhanced upwards vision

Flame symbol provides certainty workers have the right cap for flammable risks

N.B - First Base 3 FR can only be customer embroidered with flame retardant threads, contact Scott Safety Customer Service for details.
