

Dräger PARAT 4500 Industrial Escape Hood

ST-2624-2005

Where hazardous substances exist in your workplace, you can never entirely rule out the possibility of these substances leaking out into the air. However, with the correct safety precautions, including the use of the Dräger PARAT 4500, you can escape safely.

ST-2418-2003

Dräger PARAT 4500:
Industrial escape hood

Dräger Parat 4500 Industrial Escape Hoods give you a minimum of 15 minutes escape protection against toxic industrial gases, fumes, and particles – helping you to escape to safety.

As Dräger PARAT 4500 is a hooded version it ensures a safe escape for bearded users and spectacle wearers. One-size-fits-all provides nearly everyone a fit to escape safely.

Equipped with a combination filter – the Dräger PARAT 4500 protects wearers against particles, toxic industrial gases, and fumes.

In an escape situation there is no time for blurred vision. The Dräger PARAT 4500's wide visor specially treated with an anti-fog

coating keeps you seeing clearly as you make your escape.

Flexible packaging options allow you the option of a soft-pack unit to carry or travel with you – or a well-protected plastic case – or the heavy-duty case tried and tested in heavy industry, including mining.

Benefits:

- One-size-fits-all: even fits children.
- Wide, anti-fog coated visor – see clearly during an escape.
- Highly efficient filter: filters out toxic industrial gases, fumes and particles.
- Three different packaging variations – the right pack for every situation.

Dräger PARAT 4500 – another quality product from Dräger Safety.
