

NEW **SLICK**® range

Developed specifically for social and private housing, Slick® is the only range of fast-fit rechargeable ionisation and optical smoke alarms, and heat alarms guaranteed for 10 years. All Slick® alarms are BSi Kitemarked to reinforce the consistent quality provided by the world's largest manufacturer.

Lic No: KM524754
BS EN 14604: 2005

Datasheet for Models:

1SFWR

1SFW

230V Mains Fast-Fit Ionisation Smoke Alarms

1SFWR – with the latest Rechargeable Polymer Lithium cell back-up and full 10-year guarantee.

1SFW – with Duracell loose alkaline battery back-up and 6-year guarantee.

Key Features

- 'Wireless Capability' enabling use with Kidde Fyrnetics new Wireless Alarm Base (Model: **RF-SFTP**), for wire-free interconnection.
- Compatible with Kidde Fyrnetics new Remote Test & Hush switch (Model: **KN-RTH-RF**) via the Wireless Alarm Base.
- Integral, double-decker screwless terminal block for fast, push-fit connection.
- Unique fast-fit system with separate base plate, enabling fitting after construction and removal for maintenance.
- Auto resets after activation with latching LED allowing the initiating alarm to be identified.
- Separate Hush & Test buttons for ease of use.
- Green & Red LED's to indicate alarm status.
- Interlinkable with Slick® or Firex hard-wired smoke & heat alarms.
- Can be added to existing Slick® or Firex installations.
- Interlinkable with Kidde hard-wired CO alarms using 'Smart Interconnect' technology.
- Up to 6 months continuous operation from back-up cells, in the event of mains failure.
- 30 days low battery warning indicator.

Applications

Both models are mains powered (for professional installation) with back-up power, complying with current minimum requirements of the relevant Building Regulations for new housing, i.e. Grade D (BS5839, Part 6).

Ionisation Smoke Alarms are for use where a fast flaming fire (for example, electrical equipment igniting) is more likely to be a hazard than a slow, smouldering one, such as dining and living rooms. They are more prone to nuisance alarms from cooking particles and steam near kitchens. They contain a very small amount of Americium 241 radioactive material, which may be a consideration for storage and disposal.
