MicroMaXX

[Short-duration Breathing Apparatus
for work and rescue]

MicroMaXX

[Short-duration Breathing Apparatus
for work and rescue]

Ready for use

Made up of a compact pressure reducer, a 3 litre composite cylinder, for a service time of approx. 18 minutes, the rugged demand valve AutoMaXX®-N, a convenient multi-pass harness with integrated softbag, plus a full face mask MicroMaXX is always ready for use.

The innovative demand valve AutoMaXX®-N can be disconnected, e.g. for testing. Its maintenance requirements are extremely low, for instance it does not even need any lubrication.

MSA

The brand new short-duration SCBA MicroMaXX is amazingly flexible, light and thus convenient for all sorts of activities associated with work and rescue. MicroMaXX is approved according to EN 137.

- Flexibility to suit all requirements
- Lightweight for optimal comfort in all applications
- Ease of use for fast and simple donning
- Reliable & robust, due to MSA's experience in respiratory protection since 100 years

MSA

Lightness

With 4,95 kg [ready for use] MicroMaXX is extremely low weight and does not burden the user at all. It is probably the lightest breathing apparatus for work available.

Flexibility

MicroMaXX has a multi-pass harness which permits three different carrying modes. The carrying modes can be switched quickly and easily.

The functional hip carrying mode:
For those applications where there is enough space to move around.

The classic backpack mode:
If for instance the hip carrying mode is unsuitable due to wearing a tool belt, backpack-style shoulder carrying loops are easily made.

The practical carrying mode between the knees:
For example on entering a narrow shaft or sewers the MicroMaXX with one adjustment can be lowered from the hip carrying mode down to the knees.

Options

For a complete and ready to use device you can have the MicroMaXX with the full face mask Advantage 3000 or the 3S.

Furthermore you can use the premium full face mask Ultra Elite.

You have the choice.

[In case you need detailed informations please refer to the following leaflets:
Advantage 3000: 05-517.1, 3S: 05-405.2, Ultra Elite: 05-418.1].

Storage

If MicroMaXX is carried but not used, the demand valve and mask are stowed in the water spray protected bag. Moreover, the complete appliance can be kept in an optional storing bag, in a release holder on a wall or in a vehicle.

The Advantage 3000 is the new full face mask generation with ultimate panoramic vision. Lightweight and low-profile, with a patented new head harness concept featuring three sizes.

The 3S is the most successful full face mask design in the world with over 5 million units sold. You can choose between standard or small size.

Optional wall support
