

**The Signalpoint range of flammable, toxic and oxygen gas detectors offer users a low cost solution to their indoor gas monitoring needs.**

# Zareba Signalpoint

## One-Stop Shop

- Flammable, toxic and oxygen versions available
- IP54 as standard
- Suitable for indoor use

## Proven Sensor Technology

- Surecell™ electrochemical sensors
- Poison resistant catalytic bead
- Fast and reliable

## Combustible Version

- ATEX hazardous area approval
- Performance to EN50054
- Typical 5 year operational life

## Toxic and Oxygen Versions

- Indoor non hazardous area use
- Local LED indication of status (operation, A1 and A2)
- Performance to EN45544\*
- Typical 2 year operational life

\* H2S version only

## Easy to Use

- Factory set operation
- Simple to replace sensors
- Minimal training required

## Friendly Installation

- Wall or ceiling mounting
- Integral junction box
- Pre-drilled M20 clearance cable entry

## Range of Accessories

- Weather Housing
- Flow adaptor
- Duct mounting kit
- Collecting cone

**The Signalpoint range of flammable, toxic and oxygen gas detectors offer users a low cost solution to their indoor gas monitoring needs. Supplied with an integral pre-wired junction box, the detector can be installed using conduit or cable and glands depending on individual site standards.**

Two basic arrangements are provided. Flammable detectors offer mV bridge output for use with dedicated gas control systems (such as Unipoint) and are certified under ATEX for use in potentially explosive atmospheres. Toxic and oxygen detectors are designed for use in non explosive atmospheres. They are 2 wire 4-20mA loop powered and can be used with PLC or dedicated gas control systems.

Toxic and oxygen versions of Signalpoint also provide a local LED indication of their status; periodic green flash (OK), flashing amber (warning) and flashing red (alarm). Seconds count and so the front end sensor design ensures fast speed of response even with 'sticky' gases.

Easy installation is provided for. The junction box includes 'hidden' mounting for wall and ceiling fixings. The hinged lid of the junction box ensures both hands are free to complete electrical connections via the M20 clearance cable/conduit entry.

Maintenance requirements are kept simple and to a minimum. Normally used with the Zareba range of industrial controllers, all user adjustments are made at the controller as required. At the end of their operating life, simply replace the sensor before re-configuring the controller. Sensor exchange kits are available to replace the electrochemical sensors used in the toxic and oxygen detectors. The flammable sensor is simply replaced by fitting a new lid complete with sensing element.

Signalpoint offers low cost, easy installation and simple maintenance. As part of any Zareba gas detection system you are assured of being surrounded by gas detection equipment you can trust to keep you safe.

# Installation Details

## Dimensions

Signalpoint flammable and toxic gas detectors have been designed to provide for user friendly installation. The hinged lid, when opened, reveals three mounting holes (suitable for M3.5 or No. 6 wood screws) thereby removing any need for additional mounting brackets. These mounting holes are outside the weatherproof seal to maintain the IP rating.

The hinged lid ensures hands free, unhindered access, to terminals for easy termination of incoming cables. A pre-drilled M20 clearance entry allows connection via conduit or cable with suitable glands. For toxic and oxygen detectors a weatherproof compression gland is recommended. Where the flammable unit is used in potentially explosive atmospheres a suitably certified cable gland must be used.

2 or 3 wire cables with a cross sectional areas of 0.5mm<sup>2</sup> (20AWG) to 2.5mm<sup>2</sup> (14AWG) may be used. The use of a screen to ensure maximum protection against false alarms is recommended. Where flammable detectors are being installed in potentially explosive atmospheres ensure necessary local codes of practice are followed.

Whether using Signalpoint flammable, toxic or oxygen gas detectors the use of any dedicated Zareba gas detector controller is recommended to ensure a simple, cost effective solution to your total gas monitoring needs.

Flammable & Toxic/Oxygen version

## Electrical Connections

Typical Flammable Detector Connections  
(3 Wire mV Bridge Circuit).

Typical Toxic Detector Connections  
(2 Wire 4-20mA loop).

# Technical Summary

General Specification				
<b>Use</b>	Low cost, fixed point indoor gas detector for the protection of personnel and plant from flammable, toxic and oxygen gas hazards			
Detectable Gases				
Gas	Range	Warm-up time	Operating Temperature	
			Min	Max
Flammable	100%LEL	< 10 minutes	-30°C / -22°F	+40°C / +104°F
Oxygen	25%VOL	< 5 minutes	-15°C / +5°F	+40°C / +104°F
Carbon Monoxide	100ppm, 200ppm, 500ppm	< 3 minutes	-20°C / -4°F	+40°C / +104°F
Hydrogen Sulfide	20ppm, 50ppm, 100ppm	< 3 minutes	-20°C / -4°F	+40°C / +104°F
Chlorine	5ppm, 15ppm	< 5 minutes	-20°C / -4°F	+40°C / +104°F
Ammonia	50ppm, 1000ppm	< 3 minutes	-20°C / -4°F	+40°C / +104°F
Construction				
<b>Electrical</b>	<b>Flammable (0-100%LEL)</b> 3 wire mV bridge 2.9-3.5V, 200mA constant current, 0.7W (max.) 4 way terminal block. The connecting cabling should be three core multi-strand plus screen with a conductor size of 0.5mm <sup>2</sup> (20AWG) to 2.5mm <sup>2</sup> (14AWG).		<b>Toxic &amp; Oxygen</b> 2 wire loop powered 4-20mA (plus screen) 16-30V, 0.9W 3 way terminal block. The connecting cabling should be 2 core multi-strand plus screen, with a conductor size of 0.5mm <sup>2</sup> (20AWG) to 2.5mm <sup>2</sup> (14AWG).	
<b>Material</b>	Sensor: Polyphenylene Sulfide (PPS). Integral Junction Box: Impact resistant Nylon.			
<b>Weight</b>	465g (16.4oz)		495g (17.4oz)	
<b>Certification</b>	Ex II 2G EEx e d IIC T4 Tamb = -30°C to +40°C BAS98ATEX2085X		Safe area use only	
<b>Applicable Standards</b>	This products complies with the relevant CE standards including:			
	EMC to BS EN50081 part 1, BS EN50082 part 1 Performance to EN50054		EMC to BS EN50081 part 1, BS EN50082 part 2 Performance to EN45544	
Environmental				
<b>IP Rating</b>	IP54 in accordance with EN60529:1992			
<b>Operating Humidity Range</b>	Continuous: 20-90%RH (non condensing), Intermittent: 10-99%RH (non condensing)			
<b>Operating Pressure</b>	90-110kPa			
<b>Storage Conditions</b>	0°C to +25°C (32°F to +77°F).			

# Ordering Information

## Ordering Information

### Detectors

2106B1100	Signalpoint 100% LEL Flammable Detector
2106B1300	Signalpoint H2S 20 ppm Toxic Detector
2106B1301	Signalpoint H2S 50 ppm Toxic Detector
2106B1302	Signalpoint H2S 100 ppm Toxic Detector
2106B1305	Signalpoint CO 100 ppm Toxic Detector
2106B1306	Signalpoint CO 200 ppm Toxic Detector
2106B1307	Signalpoint CO 500 ppm Toxic Detector
2106B1310	Signalpoint Cl2 5 ppm Toxic Detector
2106B1311	Signalpoint Cl2 15 ppm Toxic Detector
2106B1313	Signalpoint NH3 50 ppm Toxic Detector
2106B1314	Signalpoint NH3 1000 ppm Toxic Detector
2106B1316	Signalpoint O2 25% V/V Toxic Detector

### Standard Supply

Each detector is supplied complete with integral junction box, single non threaded M20 entry, hinged lid and instruction leaflet sealed in a plastic bag.

### Optional Accessories

02000-A-1645	Calibration gas flow housing (for flammable and toxic)
02000-A-3120	Calibration gas flow housing (for toxic adsorbent gases)
02000-A-1635	Weatherproof cap for use with toxic/oxygen detector including remote gassing nozzle
02000-A-1640	Weatherproof housing for use with flammable detector including remote gassing nozzle
02000-A-1642	Collecting cone (flammable gases lighter than air)
02000-A-3120	Flow housing assembly
2106B1110	Catalytic bridge to 4-20mA converter
00780-F-0018	Flammable detector sensor filter
00910-A-0404	Hydrophobic barrier for use with toxic detectors
2106D2097	Gas calibration cap for use with toxic detectors sensor

As World leaders in gas detection solutions, Honeywell Analytics' Zareba range of gas detection systems has been designed to provide efficient, practical and cost-effective equipment to protect people from a variety of forms of hazardous gas. The equipment is also simple to install and easy to operate and maintain.

## The Zareba range of fixed gas detection

Sensepoint

Sensepoint Plus

Sensepoint Pro

Touchpoint 1

Touchpoint 4

### Sensepoint range

Designed for industrial use, the Sensepoint range provides an easy way of ensuring legislative requirements are met.

### Touchpoint

Designed for industrial use, the Touchpoint range provides an easy way of ensuring legislative requirements are met. It is particularly suited where a number of small, discrete, stand-alone systems are required.

Metro

Metro controller

### Metro

For commercial environments such as car parks, municipal buildings and retail facilities, Metro offers a fully programmable, addressable gas detection system.

Unipoint

Unipoint is a simple DIN rail mounted controller offering integrators a flexible and low cost solution to incorporate flammable, toxic or oxygen gas detection into their control systems. From car parks and boiler houses to analyzer shelters or crane cabs in offshore facilities.
